

## CROWDER CIVIL & ENVIRONMENTAL

### **Crowder Civil & Environmental awarded Lake Hartwell WTP Electrical System Improvements in Anderson, SC**

APEX, NC (12/21/2009) – Crowder Civil & Environmental has been awarded the Lake Hartwell WTP Electrical Improvements project in the amount of \$4,938,418. The project will be completed for the Anderson Regional Joint Water System at the Lake Hartwell Water Treatment Plant, a 48 million gallon per day water treatment plant in South Carolina that draws water from the 55,000 acre Lake Hartwell Reservoir.

Scope of the project includes replacing two existing generators with two new 1500KW generators that will provide reliable back-up power for the water treatment plant operations. Additional work includes installation of a new dual feed grounded wye conductor system, conversion from a base 2400 volt system to a 4160 volt system, as well as additional related improvements.
